

Traceable Data

Step No.	Data and Time	Description
0	25-04-2023 06:06:28	New .csv file is loaded with Iris.csv name
1	25-04-2023 06:06:32	Idcolumn removed from data
2	25-04-2023 06:06:34	Skip and Redirect to Handle Missing Values step
3	25-04-2023 06:06:43	Skipped and Redirect to Label Encoding step
4	25-04-2023 06:06:48	Done Label Encoding of Species column name from data
5	25-04-2023 06:06:53	Skipped and Redirect to outlier step
6	25-04-2023 06:07:03	Skip and Redirect to Scaling step
7	25-04-2023 06:07:14	Data splitted into Feature and Target data
8	25-04-2023 06:07:14	Done Scaling with choosing Species as target column by MinMax Scaling method
9	25-04-2023 06:07:20	With choosing 0.08 as test size data is splitted into feature_train,feature_test,target_train,target_test
10	25-04-2023 06:07:31	Logistic Regression model is build with precision score 0.94,recall score 0.83,and accuracy score 0.92
11	25-04-2023 06:07:40	Continuing with Logistic Regression model redirect to predict step
12	25-04-2023 06:07:43	PDF file is downloaded with MLRT_info.pdf name
